

# **MINI MINERS MONTHLY**

## Diamond Dan's "Go Fish!" Mineral Game™

On the following pages are what you need to print out your own mineral "Go Fish!" game. Print them, in order, back to back. You'll notice that the second page is the back side of the cards, and will be the same for all the cards in the set.

We recommend that you print these out on heavier paper or card stock. Regular printing paper will be too thin and too hard to handle. And they won't last very long.

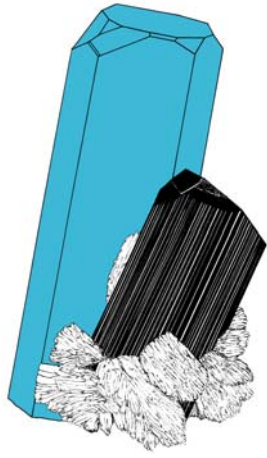

Once they are all printed out, carefully cut them out around the border on the front side of the cards, the mineral side. Shuffle them and pass them out 7 cards to each of the players. Put the rest of the cards, face down, in the middle of the playing area.

Then, one player asks another for a matching card. If the player has it, that player gives it to the one who asked. And the one who asked puts the pair down on the table in front, and then gets to ask for another card from any of the players. When the other player doesn't have the card, he or she says, "Go Fish!" Take a card from the top of the pack that is in the center. If you picked the card you asked for, you get to go again. If not, the next player takes his or her turn.

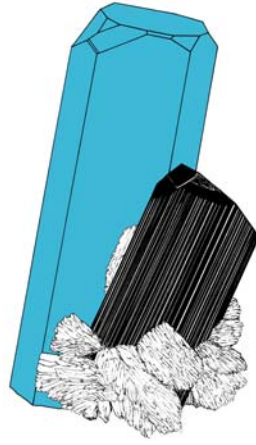

The player who matches all the mineral cards in his or her hand first is the winner. You can then reshuffle and play again, or let the others continue until all the cards are gone.

**This is a gift to you from Diamond Dan Publications
